

Topic

Learning from the experts : Fundamentals and techniques in head and neck reconstruction

《Harvesting, characteristics, and postoperative management of various flaps》

Basics and applications of DP flap and pectoralis major myocutaneous flap	Fumitaka Koga, Hisashi Migita, Yoichiro Morihisa, et al	304
Latissimus dorsi myocutaneous flap	Kentaro Tanaka	311
Head and neck reconstruction using free forearm or rectus abdominis flap	Kazuya Kuroda, Tateki Kubo	316
Anterolateral thigh flap	Shimpei Miyamoto, Mutsumi Okazaki	323
Fibula free flap, scapular free flap	Taku Maeda	328
Free jejunal flap	Satoshi Akazawa, Masaki Arikawa, Takeichiro Kimura, et al	340

《Practical approaches to head and neck reconstruction》

Key points of oral cavity and oropharyngeal reconstruction	Masahiro Nakagawa	346
The practice of rigid mandibular reconstruction :		
Essentials from preoperative simulation to wound closure	Azusa Oshima, Takuya Higashino	353
Reconstruction of hypopharynx and esophagus	Sasagu Yagi, Takeo Osaki, Kosuke Masaoka, et al	358
General overview of maxillary reconstruction	Takeichiro Kimura, Satoshi Akazawa, Masaki Arikawa, et al	364
Reconstruction for large anterior skull base defect	Hisashi Motomura	370
Transnasal endoscopic anterior skull base reconstruction	Kazuhiro Omura	378
Surgical management after tracheal resection	Naoki Otsuki	383
Basic strategies for facial nerve reconstruction and final functional and aesthetic optimization of sequelae	Miki Kanbe, Kazunobu Hashikawa	388
Practical aspects of nasal reconstruction : Fundamental concepts and key techniques from a plastic surgical perspective	Tatsuyuki Ishii, Keisuke Okabe, Kazuo Kishi	394
Reconstruction of the external auditory canal	Jun Yokoi, Takeshi Fujita	399
