

Stomach and Intestine (Tokyo)

Japanese Journal

edited by Editorial board of the *Stomach and Intestine (Tokyo)*

associated with The Research Society for Early Gastric Cancer

Volume 50 Number 3 March 2015

CONTENTS

The theme of This Month :

Magnifying Endoscopic Pitfall in the Diagnosis of Lateral Extension of Gastric Cancers

Introduction	Tsuneo Oyama	247
The Histopathologic Feature of the Gastric Cancer with Difficulty of Determining Lateral Extension	Yutaro Egashira, et al	251
Usefulness and Limitations of the Magnifying Endoscopy with Narrow Band Imaging for Delineation of Very Well Differentiated Adenocarcinoma of the Stomach.	Takashi Nagahama, et al	267
Characteristic Findings of Difficult Cases to Diagnose Using ME-NBI.	Junko Fujisaki, et al	279
Magnifying Narrow-band Imaging of Early Gastric Cancers Detected after <i>Helicobacter pylori</i> Eradication	Masaaki Kobayashi, et al	289
The Effect of Different Magnification Levels on the Ability to Delineate Margins of Early Gastric Cancers	Kunihisa Uchita, et al	301
Characteristics of the Background Gastric Mucosa Surrounding Differentiated-Type Gastric Cancer with Unclear Margins	Masashi Kawamura, et al	311
Usefulness of Magnifying Endoscopy with FICE and BLI for Determining the Horizontal Margins of Early Gastric Cancer	Hiroshi Matsuzaka, et al	321
Moderately Differentiated Gastric Adenocarcinoma in Which a Positive Lateral Margin was Histopathologically Diagnosed Following Endoscopic Submucosal Dissection, Report of a Case	Satoru Hashimoto, et al	332
Magnifying Endoscopy with Narrow-Band Imaging Fails to Diagnose the Extent of Undifferentiated Type of Early Gastric Cancer, Report of a Case	Eiji Umegaki, et al	339
Editor's Comments to the Case Reports from Clinical Point of View	Kenshi Yao	347
Editor's Comments to the Case Reports from Pathological Point of View	Ryoji Kushima	351
Case Reports		
Benign Esophageal Ulcer Associated with Drug Use, Report of a Case	Manabu Ishii, et al	353
