

# Stomach and Intestine (Tokyo)

Japanese Journal

edited by Editorial board of the *Stomach and Intestine (Tokyo)*  
associated with The Research Society for Early Gastric Cancer

Volume 53 Number 2 February 2018

## CONTENTS

The theme of This Month :

### Scoring Procedure and Clinical Significance of Mucosal Healing in IBD

|                                                                                                                                                                                                 |                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-----|
| Introduction                                                                                                                                                                                    | Takayuki Matsumoto        | 146 |
| Assessment of Histologic Disease Activity in Evaluation of Endoscopic Severity of Ulcerative Colitis—From a Stand-point of Assessment of Biopsy Specimens                                       | Yoichi Ajioka, et al      | 148 |
| Mucosal Healing and Long-term Prognosis in Management of IBD                                                                                                                                    | Tadakazu Hisamatsu, et al | 157 |
| Characteristics of Different Classifications Based on Normal Endoscopy Findings—Characteristics and Objectives of the New and Old Severity Scores Based on Intra- and Intertester Consistencies | Teruyuki Takeda, et al    | 163 |
| Image Enhanced Endoscopic Features in Inflammatory Bowel Diseases—Assessment of Disease Activity                                                                                                | Masami Ijiri, et al       | 169 |
| Assessment of Disease Activity for Ulcerative Colitis Depends on Magnifying Endoscopic Findings Using Narrow Band Imaging                                                                       | Kenji Watanabe, et al     | 177 |
| Evaluation of the Severity of Ulcerative Colitis Using Endocytoscopy                                                                                                                            | Yoshihiro Nakazato, et al | 183 |
| Endoscopic Evaluation of Disease Severity in Crohn's Disease—Usefulness and Problems of Scoring System Using Ileocolonoscopy                                                                    | Yuta Fuyuno, et al        | 194 |
| Small Bowel Endoscopic Evaluation in Patients with Crohn's Disease                                                                                                                              | Kento Takenaka, et al     | 203 |
| Evaluation of Severity Using Small Bowel Capsule Endoscopy                                                                                                                                      | Tepei Omori, et al        | 211 |
| Evaluation of Inflammatory Small Bowel Diseases Using Confocal Laser Endomicroscopy                                                                                                             | Naoki Ohmiya, et al       | 221 |

### Case Report

|                                                                                                                                           |                     |     |
