

KEY WORDS INDEX (From vol. 50 no. 1 to vol. 50 no. 12, 1998)

[A]	
Al portion	569
abducens nerve injury	1029
abscess, prevertebral	75
acetylcholine	39
acetylcholinesterase	39
ACTH	380
activity of the motor neurons	841
acute cerebrovascular disorders	787
acute measles encephalopathy	761
acute transverse myelitis	181
ADC	712
adenovirus	731
agammaglobulinemia	191
age	631
aging	1009
a., premature	977
AIDS dementia complex	5
alcoholism, chronic	372
aldose reductase inhibitor	817
aluminum	767
Alzheimer disease	5, 45, 415, 463, 797
Alzheimer-type dementia	895
amino acid	1018
ammon's horn sclerosis	253
amnesia, retrosplenial	69
amnesic syndrome	69
amygdala	643
amyloid precursor protein	719
amyloid β protein	797
amyotrophic lateral sclerosis(ALS)	597, 606, 615, 625, 719, 915
aneurysm	
a., dissecting	659
a., intracranial	258
a., ruptured cerebral	437
angiotropic large-cell lymphoma	1133
angiography	659
angiotensin converting enzyme(ACE)	1078
animal models	625
anisotropy	712, 787
anterior choroidal artery	1119
anticardiolipin antibody	181
anti-GAD antibody	177
anti-GM 1 antibody	849
anti-GQ 1 b antibody	849
antineutrophil cyto-plasmic-autoantibody (ANCA)	56, 1107
antisense	1101
anti-sulfated glucuronyl lactosaminy	
paragloboside antibody	181
aplastic anemia	739
apomorphine	33
apoptosis	330, 407, 797
apparent diffusion coefficient	787
arginine vasopressin	809
argyrophillic threads	263
arteriosclerosis	1113
arteriovenous malformation	111
ascending myelopathy	1133
aspiration surgery	751
astrocytic plaque	263
astrocytic tumor	497
auditory brainstem response(ABR)	361
auditory evoked magnetic field	51, 367
autoimmune disease	177
autonomic nervous system	745
autopsy	469, 637
axonal flow	719
axonal regeneration	227
axonal transport	703
a. impairment	719
axon-glial cell interaction	236
axonography	712
[B]	
basal ganglia	33
Bax	330
Bcl-2	330
Bell's palsy	325
Birbeck granule	453
blink reflex	361
blood-brain barrier(BBB)	809
bone marrow transplantation	651
brain	273
b. edema	809
b. ischemia	18
b. tumor	511, 519, 731, 936
brainstem hemorrhage	631
brainstem infarction	1125
burden	561
busulfan	651
[C]	
Ca ²⁺	1093
C4d	137
candidate gene	1071
capillary telangiectasia	111
caregiver's appraisals	415
carotid artery	186
carotid ultrasonography	1059
carpal tunnel syndrome	933
cauda equina syndrome	1133
cavernous malformation(angioma)	111
cavernous sinus	258
cell adhesion molecules	211

central caudal nucleus	387	[D]	
cerebellar atrophy	177	deafness, pure word	51
cerebellar hemorrhage, hypertensive	751	defective route finding	69
cerebellum	923	dementia	463, 561, 915, 1018
cerebral arterial occlusion	279	d. with Lewy body	45
cerebral blood flow	829, 1018	diabetic polyneuropathy	817, 933
cerebral circulatory insufficiency, chronic	829	diffuse Lewy body disease	907
cerebral infarction	56, 1119	diffusion	712, 787
c., acute state of	147	d. -weighted imaging	555
c., asymptomatic	821	direct pathway	923
cerebral ischemia	39, 347, 719	dissecting aneurysm	659
c., acute	555	dissection	186
cerebral vascular malformation	111	distal motor latency	933
cerebral vasospasm	443	diurnal fluctuation	387
cerebrospinal fluid	1018	dizziness	548
cerebrovascular disease	1059	dopaminergic denervation	33
cerebrovascular disorders, acute	787	dorsal funiculus	236
cerebrum	965	drug effect	597
CGG repeat	317	dynein	691
chaperone	127	[E]	
choline acetyltransferase	39	elderly patient	751
chronic alcoholism	372	electron micrograph	432
chronic cerebral circulatory insufficiency	829	embolism	171
chronic enteroviral meningitis	191	embolization	258
chronic inflammatory demyelinating polyneuropathy	1107	encephalitis	253
chronic progressive radiation myelopathy (CPRM)	651	encephalopathy, acute measles	761
chronic subdural hematoma	249	endoscope	427
cilostazol	829	endovascular surgery	258
clear cell ependymoma	432	entorhinal cortex	881, 895
clinical trial	597	epilepsy	81, 643, 1071
cloning	539	e., temporal lobe	253
CNS plasticity	339	epileptic surgery	253
cognition	249	epileptic syndrome	1071
cognitive function	372	evoked potential	
Cohen-Raphan's model	923	e., somatosensory	361
colchicine	643	e., visual	361
collision method	325	extracellular matrix	211
complement protein	137	extracranial vertebral artery	659
compound muscle action potential	325	[F]	
comprehension	995	facial nerve	325
computed tomography (CT)	447, 1003	f. injury	1029
confrontation naming	243	falls in the first year of onset	309
conus medullaris	989	far-lateral lesion	949
copper	767	fibroblast growth factor	1101
cortical deafness	443	FGP cell	965
cortical degenerative disease	895	Fisher syndrome	849
corticobasal degeneration (CBD)	263, 421, 463	flocculus	923
CPEO	1089	focal glomerulosclerosis	1119
cranial hypertrophic pachymeningitis	579	FMR-1	317
creatine kinase	745	FMR-2	317
crossed oral-pedal sensory pattern	949	fragile X syndrome	317
crushing head injury	1029	frontal lobe	995
cultured neuron	1093	functional recovery	227
Cushing's syndrome	380	F wave	817
cyst	432	[G]	
cytology	236	gammaglobulin	191
		gene amplification	519
		gene therapy	731

glioblastoma	519, 755, 1101	L-threo-Dops	157
g. subsets	497	lupoid sclerosis	181
glioma	539, 573	[M]	
glucocorticoid	841	macrophage	965
glutamate inhibitor	597	magnetic resonance angiography (MRA)	579
granulomatous angitis	1078	m., phase contrast	459
Guillain-Barré syndrome	849	magnetic resonance imaging (MRI)	165, 273, 279, 375, 447, 555, 579, 712, 787, 821, 936, 1023
[H]		magnetoencephalography	367
heat shock factor	127	m., deletion	519
heat shock protein	127	medial temporal base	463
helicase	977	medial longitudinal fasciculus (MLF)	1125
hemorrhage	631	MELAS	1089
hemorrhagic infarction	147	memory	881
herpes simplex encephalitis	1023	m. evaluation	415
hippocampal formation	881	meningeal granuloma	1078
hippocampal granular cell	643	meningioma	529
hippocampus	895, 907, 915	meningitis	
horseradish peroxidase	339	m., prulent	469
human glioma cells	330, 407	m., pyogenic	75
Hunter's syndrome	273	meningocele	63, 279
hydrocephalus	191, 427	merlin	529
hydromyelia	989	mesial temporal sclerosis	253
hypertension	631	Meynert nucleus (basal nucleus of Meynert)	39
hypertensive cerebellar hemorrhage	751	MIB-1	27
[I]		microglia	5
immune mediated syndrome	761	microscopic polyangitis	1107
immunohistochemistry	432, 907	microscopic polyarteritis	56
infarction	69	microvessels	965
insulin-like growth factor I (IGF I)	606	midbrain ptosis	387
intelligence	249	middle cerebral artery	171, 347
internal carotid artery	258	mitochondria	703
intracranial aneurysm	258	m. DNA	1089
intraoperative imaging system	1003	mitochondrial encephalomyopathy	1089
intravascular malignant lymphomatosis	1133	mixed vascular malformation	111
intraventricular administration	191	MMS	249
intraventricular hemorrhage	1113	motor function	631
ischemia	5	moyamoya phenomenon	1113
isolated ACTH deficiency	841	multifocal motor neuropathy	849
[K]		multiple sclerosis	5
kainic acid	643	multiple system atrophy	383
kinesin	691	muscle area	841
k. superfamily	691	muscle biopsy	1133
[L]		muscle pathology	841
Langerhans cell histiocytosis	453	mutation	529
laryngeal mask	751	m., SOD gene	615
lateral medullary infarction	949	[N]	
learning exercise	941	NAA/Creatine proton magnetic resonance	
lecithinized SOD	615	spectroscopy (¹ H-MRS)	421, 1023
left posterior cerebral artery	69	nephrotic syndrome	1119
leupeptin	1009	nerve conduction velocity	817
linkage study	1071	n. distribution	325
lipofuscin	1009	nerve growth factor (NGF)	330, 407
lipoma, spinal	989	nerve regeneration	236
liver	767	neural regeneration	211
l.-derived neural activator	211	neurofibromatosis type 1	279
lobotomy	755	neurofilament	691
loss of heterozygosity	539	neuroleptic malignant syndrome	745
low-dose radiotherapy	651		

neuronal death	18,606	postcentral gyrus	375
neuropathology	309,463	postural instability	309
neuropsychiatric disturbance	45	pregnancy	573,761
Neuropsychiatric Inventory	45	premature aging	977
neurosarcoidosis	1078	premotor area	243
neurosonology	1059	presenilin	797
neurotransmitter	703	presubiculum	881
neurotrophic factors	211,625	pre-supplementary motor area	941
NF2	529	prevertebral abscess	75
NF- κ B	407	prevertebral space	75
non-paralytic-pontine exotropia	1125	prion disease	5
Norris scale	597	progeria	977
[O]		progressive stroke	147
occlusion	171	progressive supranuclear palsy (PSP)	263,309
ocular flutter	469	propentofylline	330,407
oligodendroglioma	432	protease inhibitor	1009
oncogene	539	pseudomyasthenia	387
operating room	1003	pseudoradicular sensory impairment	375
operating table	1003	pulse steroid therapy	1078
optic chiasma	569	pure word deafness	51
optic nerve	227	purulent meningitis	469
optokinetic reflex	923	putamen	383
orthostatic hypotension	157	putaminal hemorrhage	51
oxidative stress	615	pyogenic meningitis	75
[P]		pyramidal tract	375
p16 gene	511	[Q]	
P 300	372	quadrantanopia	569
p53	497	[R]	
p. protein	27	radioisotope	703
p 75 NTR	407	rat	33,339
Papez circuit	881	r. cerebellum	1009,1101
paramedian pontine reticular formation (PPRF)	1125	receptor	809
Parkinson disease	5,157	r., EGF	519
parkinsonism	81	recombinant tissue plasminogen activator	347
PC-12 cell	1093	recovery	355
pedunclopontine nucleus	33	releasing phenomenon	941
penumbra	18	retrosplenial amnesia	69
peptide	809	right hemisphere	355
perforant pathway	895,907	riluzole	597
periaqueductal gray	387	rotation	33
peripheral nerve graft	227	ruptured cerebral aneurysm	437
peripheral nerves	211	[S]	
perivascular cell	965	Sanfilippo syndrome type A	165
perivascular space	273	schizophrenia	755
periventricular hyperintensity	821	schwannoma	529
persistent primitive trigeminal artery	279	seizure	63
phase contrast MRA	459	SEL-12	797
p inhibitor	548	Selegiline hydrochloride	1093
pituitary	573	sepsis	75
p. adenoma	27	sequential movements	941
platelet aggregation	548	sex differences	367
pointing task	995	short-latency somatosensory evoked potential	631
polyneuropathy	1107	Short-Memory Questionnaire	415
p. index	933	Shy-Drager syndrome	745
polyradiculoneuropathy	761	single photon emission computed tomography (SPECT)	63,165,829,1023
positional cloning	797	sinus occlusion	579
positron emission tomography (PET)	573	Sjögren syndrome	177

small artery	631	trauma	171, 186, 719
sodium ozagrel	147	trepanation	249
somatosensory evoked potential	361	triplet repeat	317
spinal angiography	447	tRNA ^{Leu(UUR)} point mutation	1089
spinal cord	236	tumor proliferation	27
spinal epidural hematoma	447	tumor recurrence	27
spinal gray matter projection of corticospinal tract	339	tumor suppressor gene	511, 539
spinal lipoma	989	tyrosine hydroxylase	1093
spinocerebellar degeneration	177	[U]	
spontaneous remission	447	ubiquitin	907, 915
spreading depression	18	unilateral neglect	147
<i>Staphylococcus aureus</i>	75	unilateral tonsillar herniation	437
static loading mechanism	1029	[V]	
steroid myopathy	380	V ₁ receptor antagonist	809
<i>Streptococcus pneumonia</i>	469	valproate	81
stress protein	127	vascular compression	569
striatonigral degeneration	383	v., cervical	548
subarachnoid hemorrhage (SAH)	443, 739, 1113	velocity encode	459
subcortical hemorrhage	375	venous angioma	459
subiculum	881	venous malformation (angioma)	111
sudden death	437	ventriculostomy	427
superficial siderosis	361, 936	vertical gaze palsy	309
superior sagittal sinus thrombosis	739	vertigo	548
supplementary motor area	243, 941	video-enhanced microscopy	703
syncope	157	visual evoked potential (VEP)	361
syrinx formation	181	visual pathway	569
systemic vasculitis	56	[W]	
[T]		Werner syndrome	977
temporal bone fracture	1029	Wernicke aphasia	355
tethering	989	Wernicke area	355
thalamus	372, 631	Wilson's disease	767
therapeutic trial	625	wobbler mouse	615
thrombolysis	347	word fluency	243
thymic carcinoid	380	working memory	995
TIA	659	[X]	
tissue plasminogen activator, recombinant	347	xenon CT	372
tonsillar herniation, unilateral	437	[Y]	
transcortical motor aphasia	243	yeast p53 functional assay	497
transcortical sensory aphasia	995	[Z]	
transcranial Doppler	1059	Zarit Caregiver Burden Interview	561
transection	5	[その他]	
transesophageal echocardiography	1059	¹¹ C methionine	573
transplant	227	3 DCT	63
transplantation, bone marrow	651	^{99m} Tc HM-PAO	63
		β-galactosidase	731
