SYMPOSIUM  Laminoplasty : Up To Date  
Preface ........................................................................................................ Masashi YAMAZAKI · 660 
Indicator for Surgical Decision Making for Cervical Ossification of the Posterior  
Longitudinal Ligament : K-Line ..................................................................... Masao KODA, et al · 661 
Preoperative Evaluation for Laminoplasty Based on Cervical Sagittal Alignment  
and Surgical Outcomes .............................................................................. Takashi HIRAI, et al · 669 
Selective Cervical Laminectomy of Limited Width to Prevent the Common Problems  
in Currently Used Cervical Laminoplasties ................................................. Tateru SHIRAISHI, et al · 675 
Laminoplasty Using Hydroxyapatite Spacers .............................................. Hiroshi NOGUCHI, et al · 685 
Expansive Open–Door Laminoplasty Secured with Titanium Plate ............... Hirotsuki NISHIMURA, et al · 693 
cervical Laminoplasty for Elderly Patients .................................................. Hiromitsu TOYODA, et al · 705

ORIGINAL ARTICLE
A Prevalence of Osteoporosis in Knee Osteoarthritis Patients and Relationship between  
Bone Density and Bone Morphology of the Lower Limb ................................ Taishi NINOMIYA, et al · 713

LECTURE
Indications and Limitations for Hip Arthroscopy ........................................ Kazuki YAMADA, et al · 719

CLINICAL EXPERIENCES
Clinical Results after Brace Treatment for Adolescent Idiopathic Scoliosis Based on  
the Database at Nara Medical University ...................................................... Hideki SHIGEMATSU, et al · 727

The Relationship Between Toe–Grip Strength and Dynamic Balance .......... Yoshitaka TODA · 731

Pain Evaluation for Shoulder Joint Disease by Electrical Stimulation Inspection of  
Sensory Pain Sensation ............................................................................... Nao KONNO, et al · 737

Gait Training by Self–Operable Body Weight Supporting Lift for Multiple Fractures  
with Lower Limb Fracture ......................................................................... Jun OKADA, et al · 743

CASE REPORT
Non–operative Reduction of Bilateral Hip Dislocation for Mesomelic Dysplasia : Case Report  
..................................................................................................................... Masaki NISHIYAMA, et al · 749
