CONTENTS

FEATURE Application of Artificial Intelligence in Orthopaedic Surgery

- Preface Seiji OHTORI • 1179
- Current Status and Future Prospects of Application of Artificial Intelligence to Orthopaedic Diseases
Ryuuichi NAKAHARA • 1181
- Automated Detection of Spinal Tumor Utilizing Deep Learning Based on Object Detection from MRI
Sadayuki ITO, et al • 1189
- 2D–3D Reconstruction of Distal Forearm Bone from X-ray Images of the Wrist
Using Convolutional Neural Networks Ryoya SHIODE • 1197
- A Deep Convolutional Neural Network for Diagnosing Fresh Osteoporotic Vertebral Fractures
on Magnetic Resonance Images Akito YABU, et al • 1205
- Gaming App Can Detect the Impairment of Thumb Opposition Movement
and Screen Carpal Tunnel Syndrome Koji FUJITA, et al • 1213
- An Algorithm for Using Deep Learning Convolutional Neural Networks with Three Dimensional
Depth Sensor Imaging in Scoliosis Detection Terufumi KOKABU, et al • 1219
- Automated Detection of Cervical Ossification of the Posterior Longitudinal Ligament in Plain Lateral
Radiographs of the Cervical Spine Using a Convolutional Neural Network Masataka MIURA, et al • 1225
- Machine Learning Approach in Predicting Clinically Significant Improvements After Surgery
in Patients with Cervical Ossification of the Posterior Longitudinal Ligament Satoshi MAKI, et al • 1231
- Osteoporosis Diagnosis Using Deep Learning with Hip Radiographs Norio YAMAMOTO • 1235
- Artificial Intelligence for the Detection of Vertebral Fractures on Plain Spinal Radiography
Kazuma MURATA, et al • 1241
- A Development of the Implant Size Prediction Model for Hip Fractures Using Artificial Intelligence :
A Multicenter Study Yoichi SATO, et al • 1247
- Application of Artificial Intelligence Technologies in Hip Joint Surgery Masaki TAKAO, et al • 1253

LECTURE

- Teepee View Naohito SATO, et al • 1261

CLINICAL EXPERIENCE

- Effectiveness of Nerve Block in Pediatric Upper Limb Fracture Under General Anesthesia
Akitoshi SAKUMA, et al • 1267

CASE REPORT

- Severe Neurological Deficit Was Avoided Using Intraoperative Neuromonitoring in Corrective Surgery
with Lumbar Pedicle Subtraction Osteotomy : A Case Report Takahiro TOMITA, et al • 1273
