### Special Issue (Congress of Clinical Ophthalmology, October 2012)

|                                                                                                                                                             |                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|-----|
| Treatment of branch retinal vein occlusion with macular edema<br>by repeat intravitreal injection and photocoagulation .....                                | <b>Daisuke Muramatsu</b> et al  | 443 |
| Ocular manifestations of patients infected by human immunodeficiency virus<br>in Tokyo Metropolitan Komagome Hospital .....                                 | <b>Tatsushi Kawaguchi</b> et al | 449 |
| Association between HIV-related retinal microangiopathy and encephalopathy .....                                                                            | <b>Yuko Iwasaki</b> et al       | 453 |
| Three-year changes in the thickness of inner macular layer in eyes<br>with glaucoma .....                                                                   | <b>Naoya Fujimoto</b> et al     | 459 |
| Changes in awareness of low-vision status by professors<br>of ophthalmology in 2011 .....                                                                   | <b>Mieko Tsuruoka</b> et al     | 463 |
| Review of infectious corneal ulcer induced by contact lens wear .....                                                                                       | <b>Michiko Matsubara</b> et al  | 469 |
| Vitreous surgery for rhegmatogenous retinal detachment in a child with<br>Stickler syndrome .....                                                           | <b>Hiroki Watanabe</b> et al    | 475 |
| Outcome of vitreous surgery with or without gas tamponade<br>for myopic retinoschisis .....                                                                 | <b>Hironori Ozaki</b> et al     | 481 |
| Optical coherence tomography in gas-filled eyes after macular hole surgery.<br>Influence of type of intraocular lens and use of face-down positioning ..... | <b>Hiroyuki Ito</b> et al       | 485 |
| Outcome of vitreous surgery for macular hole secondary to blunt ocular trauma .....                                                                         | <b>Satomi Ota</b> et al         | 491 |
| Hemispherical central retinal artery occlusion in a case of moyamoya disease .....                                                                          | <b>Mizuho Fukasawa</b> et al    | 497 |
| Outcome of transscleral sulcus fixation of intraocular lens .....                                                                                           | <b>Mutsuko Kato</b> et al       | 503 |
| Therapeutic outcome in a case of scleromalacia perforans after cataract surgery .....                                                                       | <b>Akira Sugano</b> et al       | 511 |
| Review of cataract surgery in patients with retinitis pigmentosa .....                                                                                      | <b>Yukihisa Takada</b> et al    | 515 |
| Acute corneal hydrops in a middle-aged case of Down syndrome<br>with keratoconus .....                                                                      | <b>Kazuhiro Oohashi</b> et al   | 521 |
| Two cases of corneal endothelial damage following long-term systemic treatment<br>with amantadine .....                                                     | <b>Ryoko Ishikura</b> et al     | 527 |
| Instillation of cyclosporine was effective for corneal ulcer in a patient treated<br>by peroral erlotinib .....                                             | <b>Yasuhiro Hayashi</b>         | 533 |
| A case of poorly differentiated adenocarcinoma of the lacrimal sac<br>diagnosed after dacryocystorhinostomy .....                                           | <b>Yoshihiko Isshiki</b> et al  | 539 |
| A case of pituitary adenoma initially suspected of AZOOR and diagnosed<br>by kinetic perimetry .....                                                        | <b>Katsutoshi Goto</b> et al    | 545 |
| Prototype of ophthalmoscope with built-in optotypes and filters<br>for examination of fixation .....                                                        | <b>Hiroshi Takahashi</b> et al  | 551 |
| A case of acute posterior multifocal placoid pigment epitheliopathy<br>with atypical course .....                                                           | <b>Madoka Kobayashi</b> et al   | 557 |
| A case of early-onset sarcoidosis and Blau syndrome .....                                                                                                   | <b>Chihiro Yamanaka</b> et al   | 563 |
| A juvenile case of bilateral fulminant acute retinal necrosis .....                                                                                         | <b>Tadashi Mine</b> et al       | 569 |
| Varicella vaccine was effective in a case of recurrent ophthalmic zoster<br>sine herpete .....                                                              | <b>Tatsuya Marumoto</b> et al   | 575 |

## Topic of the Month

Progress of keratoprosthesis .....**Kazunori Miyata** et al 419

## Practical Use of OCT

Retinal diseases with thickening-Macular Edema .....**Masahiko Shimura** 424

## Clinics in Thyroid Eye Disease : Starting with the Basics

What is the thyroid eye disease?-2 .....**Hirohiko Kakizaki** 432

## Let's share powerful Neuro-ophthalmology

Medical treatment for neuro-ophthalmology diseases .....**Hideki Chuman** 438

## Clinical Studies and Articles

Early-onset developmental glaucoma in a case of phakomatosis

pigmentovascularis type V.....**Kayo Koshibu** et al 591

Hypotensive effect and safety of brimonidine ophthalmic solution .....**Yasuhiro Hayashi** et al 597

Reintroduction of infliximab was effective for neurological manifestations

and recurrence of uveitis in a case of Behçet disease .....**Akane Iwasaki** et al 603
