

Case of the Month

Food-dependent exercise-induced anaphylaxis due to soybean-containing chicken nuggets, owing to Bowman-Birk protease inhibitor as the new allergen component of soybean

Atsuko ADACHI, et al397

Case Report

A case of extensive chemical burn caused by potassium hydroxide

Nobushige KOHRI, et al403

A case of dermatomyositis diagnosed by the expression of human myxovirus resistance protein A in the muscle fibers

Kosuke KATSUO, et al409

A case of thymoma-associated multiorgan autoimmunity (TAMA) presenting with treatment-resistant erythroderma

Kurumi KATSUDA, et al415

A case of anaphylaxis caused by rocuronium during general anesthesia induction

Azusa OTA, et al420

A case of generalized pustular psoriasis with *IL-36RN* mutation that successfully treated with granulocyte and monocyte adsorption apheresis and secukinumab

Yoshie TESHIMA, et al425

A case of linear atrophoderma of Moulin

Rina OHTAKE, et al432

A case of sarcoidosis with preceding skin lesion and delayed cardiac involvement detected by periodic electrocardiography

Yuki KITAJIMA, et al439

Two cases of adnexal polyp of neonatal skin

Kyoka SHIMADA, et al445

A case of deep vein thrombosis secondary to rupture of Baker's cyst

Sayuka ARAKAWA, et al450

A case of myxofibrosarcoma with amplification of short arm of chromosome 5, differentiated from dermatofibrosarcoma protuberans

Yasuhiko ASAHINA, et al455

A case of AIDS-related Kaposi's sarcoma massively affecting bilateral lower limb skin with gait disturbance

Atsuna NISHINO, et al462

A case of herpes zoster duplex diagnosed by varicella-zoster virus antigen detection kit (DermaQuick® VZV)
