

Japanese Journal of Clinical Dermatology

Volume 76 Number 11 October 2022

Original Contribution

Study of clinical features and allergen components in seven cases of fish allergy

Daisuke YOKOYAMA, et al861

Case Report

A case of acute generalized exanthematous pustulosis and erythema multiforme like eruption due to adult-onset mycoplasma infection

Yota SATO, et al869

A case of lupus erythematosus tumidus healed solely by sunscreen and smoking cessation

Takayuki KURITA, et al875

Three cases of arteriosclerosis obliterans without hyperlipidemia treated with double filtration plasmapheresis thermo-mode

Motoki ADACHI, et al881

Two cases of cutaneous hydrophilic polymer embolism on the upper extremity after coronary angiography

Yukumi MABUCHI, et al889

A case of drug-induced hypersensitivity syndrome successfully treated with short-term oral cyclosporine

Yurie KITAUCHI, et al897

A case of bullous pemphigoid associated with adalimumab therapy for rheumatoid arthritis

Eriko ADACHI, et al905

A case of acquired reactive perforating collagenosis with multiple large eruptions during administration of bevacizumab that led to bacteremia

Yuichiro SEGAWA, et al913

Three cases of skin infection due to Panton-Valentine leukocidin-positive community-acquired methicillin-resistant *Staphylococcus aureus*

Tomoko TAKADA, et al919

A case of syphilis with various skin symptoms

Yoshie TESHIMA, et al925

A case of lichen amyloidosis treated by topical steroids combined with phototherapy and heparinoid preparation

Azusa KATO, et al933
