

Japanese Journal of Clinical Dermatology

Volume 77 Number 10 September 2023

Original Contribution

Clinical and pathological study of 17 cases in which skin eruptions appeared or exacerbated during treatment with immune checkpoint inhibitors

Ryoko SHUKUYA, et al 757

Case Report

A case of neuropsychiatric systemic lupus erythematosus primarily diagnosed by dermatological evaluation of alopecia

Ko MATSUMOTO, et al 767

Two cases moderate bullous pemphigoid developed during oral dipeptidyl peptidase-4 inhibitor administration and successfully treated with topical corticosteroid and high-dose intravenous immunoglobulin therapy

Midori SUNADA, et al 773

A case of Brunsting-Perry pemphigoid on the lower jaw

Akinori MATSUDA, et al 781

A case of confluent and reticulated papillomatosis with *Malassezia furfur* in the stratum corneum

Yu KAWAHARA, et al 787

A case of Bazex syndrome accompanied by intrahepatic cholangiocarcinoma

Mizuki SUGIURA, et al 795

Two cases of skin cancer concomitant with seborrheic keratosis : Discussion on dermoscopic findings

Reina HAYAKAWA, et al 803

A case of subcutaneous abscess formed by a mesh plug penetrating the colon in late postoperative period

Yuto YAMAMURA, et al 810

Three cases of skin and soft tissue infection caused by Panton-Valentine leukocidin-positive methicillin-resistant *Staphylococcus aureus* : With consideration of toxic shock syndrome toxin-1 positive sequence type 22-PT clone

Shoya KITAMURA, et al 815

A father-daughter case of familial primary localized cutaneous amyloidosis

Marina SEKI, et al 821

Two cases of verruciform xanthoma : Investigation of pathogenesis using immunohistochemistry

Risa SUZUKI, et al 827
