Kenji Doya and Yutaka Matsuo
- 657 **Brain as a Dynamical System**
Shoji Tanaka
- 665 **Artificial Intelligence and Cerebellar Motor Learning**
Soichi Nagao and Takeru Honda
- 681 **Deep Learning and AlphaGo**
Hiroyuki Yoshida
- 695 **Automated Driving Cuts the Future**
Minoru Kamata
- 705 **Artificial Intelligence and Intellectual Property of the Medical Field**
Takanori Fujita
- 715 **Ethical Issues in Artificial Intelligence and Neuroscience**
Jiro Nudeshima
- 723 **Recent Developments in a Automated Diagnosis of Pathological Images and Three-dimensional Histopathology**
Etsuo A. Susaki
- 733 **Artificial Intelligence for Diagnostic Support of Neuroimage**
Akihiko Shiino
- 751 **Use AI for Dementia Diagnosis**
Shotai Kobayashi
- 759 **Support for Patients and Their Family Using Artificial Intelligence**
Izumi Kondo, et al.
- 765 **Corpus Analysis of Psychiatric Disorders Utilizing Natural Language Processing and Neurolinguistics**
Koki Kudo and Taishiro Kishimoto
- 771 **Simulation of Schizophrenia**
Tsukasa Okimura, et al.
- 785 **Current Status of Robotic Research for Individuals with Autism Spectrum Disorders**
Hirokazu Kumazaki
- 793 **Brain-Machine Interface and Neuro-Rehabilitation**
Junichi Ushiba

Review

- 807 **Species Differences in the Brain between Human and Non-Human Primates**
Takao Oishi

Case Report

- 815 **Reversible Cerebral Vasoconstriction Syndrome (RCVS) Induced by a Chinese Herbal Medicine; Tokishigyakukagoshuyushokyoto**
Haruka Hatakeyama, et al.
