

Topics The Science of the Embodied Brain System in Sensing Temperature

- 1 2 7 **Mechanisms Underlying Thermosensation**
Makoto Tominaga and Makiko Kashio
- 1 3 3 **Microglial Response to Brain Temperature and Neuronal Circuit Reorganization**
Junya Onodera, et al.
- 1 4 3 **Central Neural Network That Mediates Thermoregulatory Responses to Environmental Stresses**
Kazuhiro Nakamura
- 1 5 1 **β -Adrenergic Signaling Regulates a Concerted Thermogenic Response in Brown Adipose Tissue and White Adipose Tissue**
Juro Sakai
- 1 5 9 **Roles of the Circadian Clock Mechanism in the Regulation of Daily Rhythms of Body Temperature**
Takahito Miyake and Masao Doi
- 1 6 7 **Neural Circuits Involved in Torpor and Hibernation and Prospects for Artificial Hibernation Technology**
Takeshi Sakurai
- 1 7 3 **Sleep and Body Temperature**
Asuka Ishihara, et al.

Review

- 1 8 1 **The Right to Die in the United States**
Takeshi Uemura

Case Report

- 1 8 9 **Craniopharyngioma Mimicking Chordoid Glioma**
Shohei Kobayashi, et al.

- 2 0 4 Information for Authors
