

What's Next: Real-World Strategies to Treat Intractable Neurological Disorders

Tuberculous Meningitis in Which Inflammation Cannot Be Adequately Suppressed by Standard Therapy

Treatment-Resistant Tuberculous Meningitis	<i>Motohiro Yukitake</i>	4 2 1
How to Think and Treat	<i>Tetsuya Abe and Toshibiro Fukusako</i>	4 2 7

Anti-NMDAR Encephalitis with Poor Recovery on Steroid Pulse and IVIg

Practical Approach to Intensive Immunotherapy	<i>Makoto Hara and Hideto Nakajima</i>	4 3 3
Second-Line Immunotherapies and Prediction of Prognosis	<i>Akio Kimura</i>	4 4 3

Steroid-Resistant Central Nervous System Sarcoidosis

Use of Immunosuppressants and Biologic Drugs	<i>Hiroshi Kuroda</i>	4 4 9
The Selections of Multi-Agent Combination as the Initial Treatment	<i>Miwako Fujisawa and Takashi Kanda</i>	4 5 5

Parkinson's Disease with Intolerable Painful Dystonia/Dyskinesia

Classification and Therapeutic Choices of Pain in Parkinson's Disease	<i>Yuta Kajiyama and Hideki Mochizuki</i>	4 6 2
Standard Treatment and Subsequent Tips	<i>Atsushi Takeda</i>	4 6 8

Unable to Work Due to Migraine for Which Tryptan is Taken 14 Times a Month or Less

Medication-Overuse Headache (MOH)	<i>Eiichiro Nagata</i>	4 7 4
How to Choose Preventive Medication	<i>Kumiko Ishizaki and Takao Takeshima</i>	4 7 9

Therapeutic Strategy for Multiple Sclerosis Resistant to Standard Treatment

Refractory MS	<i>Hideyuki Takeuchi</i>	4 8 5
MS Cases When Relapses Cannot be Controlled with Standard Treatment	<i>Masaaki Niino</i>	4 9 0

Disability Progression in SPMS Despite Therapeutic Intervention

Refractory SPMS	<i>Hirofumi Ochi</i>	4 9 6
Current Status and Perspectives of Treatment with Disease-Modifying Drugs	<i>Takashi Obashi</i>	5 0 5

CIDP Refractory to Three Types of Mainstay Treatments

Appropriate Induction Therapy and Evaluation of Therapeutic Effect	<i>Kenichi Kaida</i>	5 1 0
Differential Diagnosis and Treatment Strategies	<i>Masahiro Iijima</i>	5 1 7

Steroids-Resistant EGPA-Induced Neuropathy with Acute Disease Progression

How to Select Remission-Induction/Maintenance Therapy Based on the Characteristics	<i>Yukio Takeshita</i>	5 2 5
How to Use Mepolizumab as Novel Targeted Agent	<i>Naoki Hattori</i>	5 3 1

Treatment of Dermatomyositis and Immune-Mediated Necrotizing Myopathy with Poor Muscle Recovery with Steroids and IVIg

Intractable Dermatomyositis and Immune-Mediated Necrotizing Myopathy	<i>Kazuma Sugie</i>	5 3 7
Therapeutic Strategies for Refractory Inflammatory Myositis	<i>Hiroyuki Tomimitsu</i>	5 4 5

Functional Movement Disorders That Do Not Improve after Explaining the Diagnosis

Do Not Treat the Disease, Treat the Patient	<i>Ken-ichi Fujimoto</i>	5 5 3
The Role of Neurologists	<i>Masabiko Tomiyama</i>	5 5 9

Late-Onset Dyskinesia Occurring During Antipsychotic Treatment for Schizophrenia

Treatments for Tardive Dyskinesia	<i>Masahiro Nomoto</i>	5 6 5
Management of Tardive Dyskinesia Based on the Latest Knowledge	<i>Mayumi Sakata and Hidefumi Ito</i>	5 7 1

Focal or Segmental Dystonia Resistant to Botulinum Toxin

Re-Evaluation, Surgery, and Botulinum Again	<i>Takahiro Mezaki</i>	5 7 5
How Do You Treat Patients in Whom Botulinum Toxin Treatment Has No Effect?	<i>Takashi Nomura</i>	5 8 1

Cryptococcal Meningitis with Inadequate Response to Antifungal Therapy or Drug-Induced Side Effects That Make It Difficult to Continue Treatment

Eleven Clinical Issues in Medical Practice		
	<i>Masaki Ishihara and Hideto Nakajima</i>	5 8 8
Management to Avoid Treatment Difficulties and Intracerebroventricular Antifungal Administration for Refractory Cases	<i>Mitsuto Sato and Yoshiki Sekijima</i>	6 0 0

Small Fiber Neuropathy with Inadequate Response to Medical Therapy

Diagnosis of The Etiology of Small Fiber Neuropathy and Treatment Option	<i>Ryo Yamasaki</i>	6 0 8
Diagnosis and Treatment of Small Fiber Neuropathy	<i>Chieko Suzuki</i>	6 1 4

Cerebral Infarction with Diffuse and Severe Atherosclerosis of The Main Cerebral Artery and Recurrent Infarction Despite Multiple Antiplatelet Agents

Treatment Strategy for Patients with Recurrent Cerebral Infarction During Antiplatelet Therapy		
	<i>Ichiro Deguchi</i>	6 2 1
Management for Acute Stroke Patients	<i>Kentaro Suzuki and Kazumi Kimura</i>	6 2 9

Essential Tremor That is Difficult to Improve with Standard Medical Treatment-Suppression

Excluding Surgical Treatment	<i>Takemori Yamawaki</i>	6 3 7
Surgical Treatment of Tremor	<i>Tatsuya Sasaki and Isao Date</i>	6 4 5

Patients with Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS) Who Have Already Visited Some Medical Institutions

Diagnosis, Treatment and Research	<i>Wakiro Sato</i>	6 5 2
The Points of Diagnosis and Treatment	<i>Tokio Shimomura</i>	6 6 0

Glioblastoma That Does Not Improve with Standard Treatment

Poor Prognostic Factors and Future Perspectives	<i>Yoshtaka Narita</i>	6 6 8
Standard and Personalized Treatment Making		
The Most of Limited Modalities	<i>Ryotaro Imai and Hikaru Sasaki</i>	6 7 7

Treatment and Care for Elderly Patients with Dementia with Lewy Bodies Presenting with Delusional Misidentification Syndrome Including Capgras Syndrome

Severe Psychiatric Symptoms Associated with Dementia with Lewy Bodies		
	<i>Michitaka Funayama</i>	6 8 5
How to Respond and Intervene from a Neurologist's Perspective	<i>Masaki Ikeda</i>	6 9 2

Intractable Orthostatic Hypotension in Patients with Parkinson's Disease

General Matters about Orthostatic Hypotension and Cautionary Notes through Our Observed Refractory Cases	<i>Tasuku Ishihara</i>	7 0 0
Early Diagnosis and Treatment Strategies	<i>Yoshio Tsuboi</i>	7 0 8
