CONTENTS

vol. 55 No. 7 July 2011

Topic of the month : Risk management for functional examinations in clinical physiology

Introduction *Yoji Ishiyama*···619

Review

Risk management for the patient as a final goal of medical services *Satoshi Homma*···621

The basic principles of risk management in clinical examinations *Hideharu Karasawa*···627

The kind of examination and the risk environment over the
laboratory of clinical physiology *Fusae Kawana*···635

Analysis and countermeasures for incidents/accidents *Haruko Kawamura*···643

Article

Risk management for circulatory function tests *Yukihide Shimo*···649

Risk management of pulmonary function tests *Naoko Tojo*···658

Neurophysiological examinations and risk management *Shozo Tobimatsu*···662

Risk management in the ultrasound laboratory *Kei Konno, et al*···667

Topics

The Internet information gathering of risk management of
clinical physiology test *Noriaki Ono*···673

Cause or Effect? Human error mechanism and countermeasures *Ryutaro Kawano*···679

Outbreak case and infection control in physiological testing laboratory *Keiji Kanemitsu*···683

Risk management for medical devices—ISO 14971 by case studies *Toshihiko Hagiwara*···687

Serial

Inquiry about the March 11th, 2011 disaster in Eastern Japan • 1

Policy regarding infection control in the disaster area *Satoshi Iwata*···692

Abnormal laboratory test values and medicine • 16

Influence of administering medicine on laboratory test values

—Drugs affecting on metabolic system *Yoshiaki Katayama, et al*···697
