

Rinsho Kensa (Journal of Medical Technology)

Editorial Board

Editor-in-Chief : Naotaka Hamasaki,
Yoshihisa Ito, Yasuo Ikeda, Satoshi Iwata,
Yoshiaki Katayama, Atsuhiko Sakamoto, Toshiyuki Yamada

CONTENTS

vol. 55 No. 9 September 2011

Topic of the month : New methods in RNA Biology

IntroductionHaruhiko Siomi...829

Review

Expanding RNA physiologyHaruhiko Siomi...831

Article

〈New techniques in transcriptome analysis〉

Transcriptome analysis using next generation sequencingAtsushi Shimizu...841

Methods to detect mRNA and miRNA associated with diseases
and problems involved in themShuji Takada, et al...847

mRNA analysis using tiling array technologyDaisuke Kaida...854

Genome-wide exploring A-to-I RNA editing sites
in human transcriptomeTakanori Yano, et al...858

HITS-CLIP as a tool to study RNA regulatory mechanismsMasato Yano...865

Circulating mRNA and microRNA as biomarkerNobuyoshi Kosaka, et al...873

〈New technologies to analyze RNA-related disease〉

MicroRNAs in biological processes and diseasesYasuyuki Hosono, et al...879

mRNA surveillance :
the mechanism of elimination of aberrant mRNAsAkio Yamashita...885

Schizophrenia through analysis of
aberrant alternative pre-mRNA splicingTakayuki Manabe, et al...893

Functional properties of long noncoding RNAs
and links to human diseaseTetsuro Hirose...900

Methods for measurement of mRNA
in analysis of the condition of a diseaseMasatoshi Yamada, et al...906

MicroRNA and metabolic bone diseaseShu Takeda...911

Serial

Inquiry about the March 11th, 2011 disaster in Eastern Japan • 3

The laboratory system of the stricken area due to
East Japan EarthquakeMasahiko Mukai...916

Abnormal laboratory test values and medicine • 18

Influence of administering medicine on laboratory test values
—Anti-Allergic DrugsNaomi Iwasaki, et al...920
