

Topics Neural Mechanisms of Cognitive Flexibility

7 5 1 Flexible Neural Encoding and Cognitive Function in the Frontal Lobe

Hajime Mushiake

7 6 1 Neural Mechanisms of Evidence Accumulation Selection for Flexible Decision Making

Takanori Uka

7 6 7 Neural Mechanisms for Goal Achievement by Coordinating Multiple Subgoals

Kei Watanabe

7 7 7 Neural Mechanisms Enabling Flexible Cognition Based on Behavioral Prediction of the Self and Others

Kentaro Miyamoto

7 8 3 Bidirectional Control of Behavioral Flexibility by Cholinergic Neurons

Kana Okada

7 8 9 Neural Mechanisms of the Nucleus Accumbens for Flexible and Strategic Decision-Making

Takatoshi Hikida

7 9 5 Development of Flexible Cognitive Functions Supporting Human Sociality

Masako Myowa

8 0 3 Interaction between Emotion and Cognition: Perspectives on the Neuroscience of Intelligence

Junichi Chikazoe

8 0 9 Can We Change Negatively Distorted Memory? The Effectiveness and Neurobiological Mechanisms of Memory Bias Modification

Yuko Hakamata

8 1 9 Identification and Control of Collective Neural Dynamics in Autism

Takamitsu Watanabe

8 3 8 Information for Authors
