

Topics Rethinking Corticothalamic Functional Interactions

7 6 1 Interaction between Corticocortical and Thalamic Inputs in the Frontal Cortex Underlying Executive Function

Yasuo Kawaguchi and Jaerin Sohn

7 6 9 Role of Thalamocortical Circuits in Action Decision-Making

Masanori Matsuzaki

7 7 4 Where Does Repetitive Negative Thinking in Depression Originate? From Right Thalamo-Cortical Circuits to Non-Invasive Neuromodulation Using Focused Ultrasound

Aki Tsuchiyagaito

7 8 1 Control of Social Behavior by Prefrontal-Paraventricular Thalamic Circuits Shaped by Developmental Social Experience

Kazuhiko Yamamuro

7 8 7 Functional Link between Sensory Information and Higher Brain Function in the Thalamic Reticular Nucleus

Akihisa Kimura

7 9 3 Functional Roles of Prefrontal-Subcortical Circuits in Primate Adaptive Behavior: Neural Basis of Experience and Inference Revealed by Pathway-Selective Manipulation

Kei Oyama

7 9 9 The Role of the Cerebellum-Thalamus-Motor Cortex in Motor Learning

Masato Inoue

8 0 5 Neural Circuits for Decision Making and Motor Execution Involving the Thalamus

Yasuhiro R. Tanaka

8 1 3 Corticothalamic Circuit Mechanisms Underlying the Regulation of Associative Memory

Kasumi Inokuchi, et al.

8 2 1 Structure and Function of Thalamocortical Circuits Underlying Alloparental Behaviors

Gen-ichi Tasaka

8 2 9 Thalamic Aphasia: Viewing Language from the Thalamus

Yoshiyuki Nishio

8 5 6 Information for Authors
