

ORIGINAL ARTICLES

- 9 Pemphigus foliaceus with negative anti-desmoglein 1 antibody by CLEIA method in the early stage showing increased titer of anti-desmoglein 1 antibody by ELISA method after 2.5 years during the remission period *K. Miyo et al.*
- 15 Pemphigus foliaceus induced by bucillamine presenting as erythroderma *M. Kanzaki et al.*
- 20 Mucosal-dominant pemphigus vulgaris with psoriasis vulgaris *M. Shirozu et al.*
- 22 Herpetiform pemphigus masquerading as dipeptidyl peptidase-4 inhibitor-related bullous pemphigoid *M. Izumi et al.*
- 27 Bullous pemphigoid during pembrolizumab therapy for lung cancer *M. Takeuchi et al.*
- 33 Successful treatment of bullous pemphigoid with intravenous immunoglobulin in a HIV-infected patient *M. Ueda et al.*
- 37 Bullous pemphigoid due to a dipeptidyl peptidase-4 inhibitor with papulo-erythroderma-like distribution *K. Sodemoto et al.*
- 41 Three cases of bullous pemphigoid associated with dipeptidyl peptidase-4 inhibitors in HLA-DQB1*03:01-positive patients *M. Kanzaki et al.*
- 46 Mucous membrane pemphigoid with autoantibodies to BP180 and LAD-1 that developed in a patient receiving dipeptidyl peptidase-4 inhibitor *K. Suda et al.*
- 51 Mucous membrane pemphigoid limited to oral mucosa *I. Omori et al.*
- 55 Mucous membrane pemphigoid presenting with enanthem limited to genital area *K. Horie et al.*
- 59 Anti-laminin-332-type mucous membrane pemphigoid successfully treated with intravenous immunoglobulin therapy *K. Eguchi et al.*
- 65 Mucous membrane pemphigoid with anti-BP230 antibodies *A. Miyazaki et al.*
- 69 Erythema gyratum repens-like erythema in a patient with resolving anti-laminin γ 1 pemphigoid *A. Sato et al.*
- 73 Epidermolysis bullosa acquisita showing acute exacerbation successfully treated with intravenous immunoglobulin and steroid pulse therapy *K. Abe et al.*
- CASE REPORTS**
- 81 Pyoderma gangrenosum induced by a dog bite successfully treated with cyclosporine monotherapy *M. Kanzaki et al.*
- 86 Eosinophilic cellulitis (Wells syndrome) showing spontaneous remission without treatment *M. Fujisaki et al.*
- 91 Localized cutaneous nodular amyloidosis showing multiple plaques on the face *Y. Hashimoto et al.*
- 95 Porokeratotic eccrine and hair follicle nevus on the head *T. Tanji et al.*
- 101 Basal cell nevus syndrome treated with imiquimod cream *H. Watanabe et al.*
- 105 Fibroadenoma in the left axillary accessory mamma *S. Uchino et al.*
- 109 Syringocystadenoma papilliferum with papillary tubular adenoma *Y. Nakagawa et al.*
- 113 Erysipeloid carcinoma due to skin metastasis of breast cancer *Y. Isami et al.*
- 117 Two cases of cutaneous metastases of lung cancer on the face *K. Kawata et al.*
- 122 Angioleiomyoma of the knee: Summary of 22 patients with angioleiomyoma in our department *L. Kanaya et al.*
- 127 Kaposi's sarcoma clinically diagnosed by using dermoscopy *K. Nagai et al.*
- 133 Multiple metastases of malignant melanoma transiently recovered from pulmonary dysfunction by vemurafenib administration *D. Hayashi et al.*
- 137 Chromomycosis requiring a differential diagnosis of actinic keratosis and treated by surgery *M. Kobayashi et al.*
- 141 Tinea nigra on the dorsal aspect of the finger *Y. Urano et al.*
- 144 Rupture of the medial inferior genicular artery aneurysm treated with conservative pressing therapy *A. Sakamoto et al.*
- MINI REPORTS**
- 150 Sarcoidosis presenting with widespread erythema nodosum-like lesions *R. Tsukahara et al.*
- 152 Bier's spot *R. Umejune et al.*
- 154 Neuromyelitis optica showing neuropathic itch-induced self-injury *A. Hashimoto et al.*
- 156 Multiple abdominal wall endometriosis *M. Sato et al.*
