Importance of using PET/CT to detect coronary or aortic diseases in elderly asymptomatic patients
Kohei Hayashida et al

Detection of papillary muscle ischemia using high-resolution cine imaging of ammonia PET
Michinobu Nagao et al

Effect of deep learning reconstruction on the image quality of ultra-high-resolution computed tomography for diffuse lung diseases
Kohei Mitsuhashi et al

A case of pulmonary toxocariasis
Sayuri Kodama et al

A case of mediastinal spindle cell liposarcoma
Yuriko Yoshida et al

A case of Erdheim-Chester disease with diffuse lung involvement
Shunjiro Noguchi et al

Spontaneous regression of pulmonary malignant lymphoma: a case report and literature review
Ayumi Ihara et al

Retrospective lung cancer detection on chest radiographs in medical checkups in two legal cases: usefulness of bone suppression and temporal subtraction
Seiji Shiotani et al

A case of peribronchiolar metaplasia presenting a localized ground-glass opacity
Hiroaki Watanabe et al

A case of Ehlers-Danlos syndrome in which lung CT findings contributed to the diagnosis
Shinsaku Matsumoto et al

Clinical study on shielding effect of 0.75 mmPb equivalent protective glasses for cardiac IVR procedure
Mime Endo et al
