|                                                                                                                                                                             |                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----|
| Dual-energy CT analyses for diagnosing lung cancer .....                                                                                                                    | Hiroaki Nagano et al    | 1   |
| Impact of high spatial resolution CT on lung cancer imaging :<br>morphological and quantitative evaluation .....                                                            | Masahiro Yanagawa et al | 11  |
| Clinical application of ultra high-resolution CT in lung cancer .....                                                                                                       | Yoshiyuki Ozawa et al   | 21  |
| Clinical application of ultra-high-resolution images : CT virtual<br>bronchoscopy as a definitive diagnostic technique for lung field foci .....                            | Hiroshi Moriya et al    | 27  |
| Radiologic findings of opportunistic infections .....                                                                                                                       | Keisuke Todoroki et al  | 39  |
| Basics of cardiac CT .....                                                                                                                                                  | Nobuo Tomizawa          | 47  |
| Three cases of postoperative pleuroparenchymal fibroelastosis (PPFE)<br>like ipsilateral upper lung field pulmonary fibrosis, incidence<br>and characteristics .....        | Takao Nakanishi et al   | 57  |
| Radiologic findings of lung metastases from adenoid cystic carcinoma .....                                                                                                  | Kaori Nakayama et al    | 65  |
| Primary myoepithelial carcinoma of the lung : a case report<br>with review of the literature .....                                                                          | Mariko Yamaguchi et al  | 71  |
| A case of multiple endobronchiolar hamartomas showing fibromata<br>with lymphatic-like cysts .....                                                                          | Mayumi Hara et al       | 77  |
| A case of sclerosing pneumocytoma .....                                                                                                                                     | Kanako Sato et al       | 83  |
| A case of anterior mediastinal seminoma with multilocular thymic cyst .....                                                                                                 | Chisaki Masuda et al    | 89  |
| A case of solitary fibrous tumor arising from within the<br>lung parenchyma .....                                                                                           | Masaki Onishi et al     | 95  |
| A case of vascular Ehlers-Danlos syndrome found incidentally<br>on a chest radiograph during routine health check-up .....                                                  | Naoki Kogayo et al      | 101 |
| A fatal case of eosinophilic pneumonia induced by daptomycin<br>progressing to acute respiratory distress syndrome in a patient<br>with interstitial lung abnormality ..... | Daisuke Kato et al      | 105 |
| * * *                                                                                                                                                                       |                         |     |
| Seromucinous hamartoma of the nasal septum with characteristic<br>imaging findings .....                                                                                    | Katsuya Sawada et al    | 111 |
| Metastatic pituitary-hypothalamic tumor from esophageal squamous<br>cell carcinoma .....                                                                                    | Taiki Yamaguchi et al   | 117 |
| EOB-MRI findings of peliosis hepatis : a report of two cases .....                                                                                                          | Masaki Sato et al       | 123 |
