

## CONTENTS

**Theme of this month : Endoscopic Approach to Benign and Malignant Hilar Biliary Strictures**

|                                                                                                                               |                                               |      |
|-------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|------|
| Editorial                                                                                                                     | <i>Hirofumi Kawamoto</i>                      | 1599 |
| Diagnostic Strategy for Hilar Biliary Stricture                                                                               | <i>Yusuke Ishida, et al</i>                   | 1601 |
| Peroral Cholangioscopy for Evaluation of the Lateral Extension of Perihilar Cholangiocarcinoma                                | <i>Nobuhiro Katsukura, et al</i>              | 1611 |
| Treatment Strategy Based on Resectability Classification for Perihilar Cholangiocarcinoma                                     | <i>Naohisa Kuriyama, Shugo Mizuno, et al</i>  | 1617 |
| Endoscopic Transpapillary Treatment of Perihilar Benign Biliary Strictures                                                    | <i>Tatsuya Sato, et al</i>                    | 1627 |
| Endoscopic Biliary Drainage for Surgical Candidates with Malignant Hilar Biliary Obstruction                                  | <i>Hirotoishi Ishiwatari, et al</i>           | 1633 |
| Suprapapillary Placement of Plastic Stents for Unresectable Malignant Hilar Biliary Obstructions                              | <i>Yoshihide Kanno</i>                        | 1638 |
| Bilateral Biliary Drainage by Stent-in-stent Method for the Patients with Unresectable Malignant Hilar biliary Stricture      | <i>Hironari Kato, et al</i>                   | 1648 |
| Drainage for Unresectable Malignant Hilar Biliary Stricture by Uncovered Self-expandable Metallic Stent (Side-by-side Method) | <i>Itaru Naitoh, et al</i>                    | 1655 |
| Drainage Using Fully Covered SEMS for Unresectable Malignant Hilar Biliary Obstruction                                        | <i>Toshio Fujisawa, et al</i>                 | 1664 |
| EUS-guided Biliary Drainage for Unresectable Malignant Hilar Biliary Obstruction                                              | <i>Daiki Yamashige, Susumu Hijioka, et al</i> | 1671 |
| Endobiliary Radiofrequency Ablation for Malignant Hilar Biliary Obstruction                                                   | <i>Tadahisa Inoue, et al</i>                  | 1681 |
| Endoscopic Management for Benign Bapaticojejunostomy Anastomotic Strictures                                                   | <i>Kei Saito, et al</i>                       | 1689 |
| Endoscopic Treatment for Malignant Hilar Biliary Obstruction in Patients with Surgically Altered Anatomy                      | <i>Shuntaro Mukai, et al</i>                  | 1697 |

## Series

**Minimally Invasive Surgery Information for Gastroenterologists :**

|                                                 |                                              |      |
|-------------------------------------------------|----------------------------------------------|------|
| Minimally Invasive Surgery for Gastric Diseases | <i>Susumu Shibasaki, Ichiro Uyama, et al</i> | 1705 |
|-------------------------------------------------|----------------------------------------------|------|

**Endoscopy : A Case of Early Gastric Cancer with *HP* Eradication of Which the Demarcation Line Could Be Detected by Microvascular**

|                                          |                                             |      |
|------------------------------------------|---------------------------------------------|------|
| Pattern Using the Water Immersion Method | <i>Ayako Kubota, Kunihisa Uchita, et al</i> | 1712 |
|------------------------------------------|---------------------------------------------|------|
