

ENDOSCOPIA DIGESTIVA

Volume 35, Number 12, December 2023

CONTENTS

Special Issue

Artificial Intelligence in Gastrointestinal Endoscopy: Updated Review

Introductory remarks

Making the most of artificial intelligence in endoscopy *Yoshio Hoshihara 1648*

A wide range of artificial intelligence (AI) in medicine *Ryuji Hamamoto 1650*

Current status of artificial intelligence (AI) for upper gastrointestinal (GI) endoscopy *Jun Ueno et al. 1660*

Development and present status of artificial intelligence (AI)
for lower gastrointestinal (GI) endoscopy *Masashi Misawa et al. 1669*

【Topics】 Initiative measures taken by the Japan Gastroenterological Endoscopy Society
in the field of artificial intelligence (AI) *Koji Matsuda et al. 1679*

【Topics】 Initiative measures taken by the Japanese Society of Gastroenterology
in the field of artificial intelligence (AI) *Yasunari Nakamoto 1685*

I. Artificial intelligence available in the market for upper GI tract: characteristics and its utilization

Computer-aided diagnosis (CADx) system for gastric cancer
by Fujifilm: CAD EYE *Mitsunori Kusahara et al. 1688*

Computer-aided diagnosis (CADx) system for gastric cancer by AI Medical Service *Mitsuru Kaise et al. 1695*

【Topics】 Development of a computer-aided detection (CADE) system
for pharyngoesophageal squamous cell carcinoma *Keiichiro Nakajo et al. 1702*

【Topics】 Global trends in detection and diagnosis AI in upper GI *Hitoshi Ikeda et al. 1706*

II. Artificial intelligence available in the market for lower GI tract: Characteristics and utilization

1. Computer-aided detection (CADE)

EndoBRAIN[®]-EYE (Olympus, Tokyo, Japan) *Taishi Okumura et al. 1709*

CAD EYE (Fujifilm, Tokyo, Japan) *Naoko Kitazawa et al. 1715*

WISE VISION[®] (NEC, Tokyo, Japan) *Masayoshi Yamada et al. 1721*

EIRL Colon Polyp (LPIXEL, Tokyo, Japan) *Shunsuke Kamba et al. 1728*

【Topics】 ENDO-AID: a platform for computer-aided detection/diagnosis
(Olympus, Tokyo, Japan) *Akiko Chino et al. 1735*

【Topics】 Global trends in computer-aided detection (CAdE) and diagnosis (CAdx) for colorectal lesions	<i>Yuichi Mori et al.</i> 1740
【Topics】 Artificial-intelligence-assisted colonoscope insertion	<i>Hiroaki Ikematsu et al.</i> 1744
2. Computer-aided diagnosis (CAdx) EndoBRAIN [®] , EndoBRAIN [®] -Plus, and EndoBRAIN [®] -UC (Olympus, Tokyo, Japan) CAdEYE (Fujifilm, Tokyo, Japan), an artificial intelligence for lesion recognition (CAdE) and optical diagnosis (CAdx)	<i>Yasuharu Maeda et al.</i> 1748 <i>Taku Sakamoto et al.</i> 1753
3. Artificial intelligence in pathology: From diagnosis to prediction of metastasis The paradigm shift brought about by artificial intelligence in pathology Prediction of lymph node metastasis in T1 colorectal cancer based on artificial intelligence-assisted digital pathology	<i>Manabu Takamatsu</i> 1760 <i>Katsuro Ichimasa et al.</i> 1766
III. Cost-effectiveness of using artificial intelligence Cost-effectiveness of using computer-aided detection (CAdE) and diagnosis (CAdx) system in the colorectum	<i>Toshio Uraoka et al.</i> 1772
Series Let's Try Clinical Research! Diagnosis procedure combination (DPC) as a research data base: characteristics and utilization	<i>Waku Hatta et al.</i> 1779
