

ENDOSCOPIA DIGESTIVA

Volume 36, Number 3, March 2024

CONTENTS

Special Issue Troubleshooting in Colonoscopy

Introductory remarks	<i>Kiyonori Kobayashi</i>	320
Troubleshooting the complications associated with colonoscopy	<i>Masashi Misawa et al.</i>	322
I. Troubleshooting the complications associated with bowel preparation		
Countermeasures against complications related to bowel preparation	<i>Hiroshi Kashida</i>	329
II. Troubleshooting the complications associated with sedation		
What should we do in cases where sedation may not be given?	<i>Yasuhiro Oono et al.</i>	334
What should we do when the patient is over-sedated?	<i>Naohisa Yoshida et al.</i>	337
【Note】 Management of propofol extravasation	<i>Takeshi Uozumi et al.</i>	342
III. Troubleshooting during colonoscope intubation		
What should we do when the scope cannot go over a flexure or junction?	<i>Naoto Sakamoto et al.</i>	345
What should we do when the colon is elongated and the scope does not advance?	<i>Naoko Nakano et al.</i>	351
What should we do when the scope cannot be advanced due to the patient's complaint of pain?	<i>Mai Fukuda et al.</i>	355
IV. Troubleshooting during the detection and diagnosis of lesions		
What should we do when the distinction between neoplastic and non-neoplastic lesions is difficult?	<i>Osamu Toyoshima et al.</i>	359
What should we do when the prediction of depth is difficult in an early-stage colorectal cancer?	<i>Keita Suzuki et al.</i>	364
【Note】 What should we do when the colon is in hyperperistalsis or spasm?	<i>Yosuke Tsuji et al.</i>	369
【Note】 What should we do when the diagnosis differs between the AI and the endoscopist?	<i>Yuichi Mori et al.</i>	371
V. Troubleshooting during and after therapeutic colonoscopy		
Troubleshooting in unexpectedly difficult ESD (in a lesion associated with severely fibrotic scar, that harbors a diverticulum in it, etc.)	<i>Tatsuya Sakurai et al.</i>	374
What should we do against massive bleeding during EMR/ESD?	<i>Chizu Yokoi et al.</i>	378
What should we do when the patient is brought to the emergency room due to bleeding after endoscopic resection?	<i>Shozo Osera et al.</i>	382

Troubleshooting for perforation due to EMR/ESD	<i>Naoya Toyoshima et al.</i>	386
Troubleshooting related to self-expandable metallic stent and transanal decompression tube	<i>Mariko Kobayashi et al.</i>	391
【Note】 What should we do when the resected polyp is too large to be retrieved through the anus?	<i>Kohei Morioka et al.</i>	395
【Note】 What should we do when the pathological vertical margin was positive after endoscopic resection for an early cancer?	<i>Hirohito Tanaka et al.</i>	398
VI. Troubleshooting during urgent colonoscopy		
What should we do when the source of bleeding cannot be identified in a case with suspected diverticular bleeding?	<i>Jun Omori et al.</i>	401
What should we do when a foreign body cannot be retrieved through the anus?	<i>Kazuo Kikuchi et al.</i>	406
What should we do when endoscopic detorsion is not successful in a case with sigmoid volvulus?	<i>Hiroyuki Imaeda et al.</i>	410
【Note】 What should we do when massive feces interferes with hemostatic treatment in a case with acute hemorrhagic rectal ulcer?	<i>Tomonori Yano</i>	414
VII. Surgical intervention as a troubleshooter for endoscopic complications	<i>Eiji Sunami et al.</i>	416
Series Efficient Use of Big Data and Information and Communications Technology (ICT) in Endoscopy		
Trial uses of telemedicine in the field of gastrointestinal endoscopy	<i>Yoshinori Morita et al.</i>	422
