CONTENTS

Special Issue

Working Toward the Early Detection and Diagnosis of Pancreatic Cancer

Introductory remarks

Silver lining	<i>Naotaka Fujita</i>	690
Current status of the early detection and diagnosis of pancreatic cancer	<i>Yutaka Suzuki et al.</i>	692
Pathological knowledge endoscopists need for the early diagnosis of pancreatic cancer	<i>Naoki Sano et al.</i>	699
Strategy for the early diagnosis of pancreatic cancer	<i>Kazumasa Nagai et al.</i>	710
The role of ERCP in the early diagnosis of pancreatic cancer: its historical transition	<i>Ichiro Yasuda et al.</i>	717
Current status and challenges of pancreatic juice cytology for the early diagnosis of pancreatic cancer	<i>Shin Haba et al.</i>	721
EUS findings for the early diagnosis of pancreatic cancer	<i>Kosuke Minaga et al.</i>	726
Usefulness and limitations of EUS-FNA for the early diagnosis of pancreatic cancer	<i>Masahiro Itonaga et al.</i>	732
Pathological diagnosis aimed at early-stage pancreatic cancer	<i>Yoshiki Naito et al.</i>	737
Potential of the latest endoscopic innovations for the early diagnosis of pancreatic cancer	<i>Yuki Tanisaka et al.</i>	742
【Column】 The importance of supporting pancreatic cancer patients undergoing endoscopy: patients' point of view	<i>Yoshiyuki Majima</i>	747
In order not to overlook pancreatic ductal adenocarcinoma derived from/ concomitant with IPMN: EUS observation and surveillance	<i>Koh Fukushi et al.</i>	749
In order not to overlook pancreatic cancer in patients with chronic pancreatitis	<i>Shinsuke Koshita</i>	756
Current status of familial pancreatic cancer registry in Japan	<i>Susumu Hijioka et al.</i>	760
Current status and challenges of screening program for the early detection of pancreatic cancer based on risk factors	<i>Ryota Sagami et al.</i>	764
Current status and challenges of the early detection of pancreatic cancer in regional areas	<i>Mitsuharu Fukasawa et al.</i>	768
Current status and challenges of the early detection of pancreatic cancer in urban areas	<i>Shujiro Yazumi et al.</i>	775
Current status of artificial intelligence for the early detection of pancreatic cancer	<i>Takamichi Kuwahara et al.</i>	779
Current status of endoscopic liquid biopsy for the early detection of pancreatic cancer	<i>Noboru Ideno et al.</i>	783
【Topics】 Potential of metabolomics for the early detection of pancreatic cancer	<i>Masao Toki et al.</i>	788
【Series】 Efficient Use of Big Data and Information and Communications Technology (ICT) in Endoscopy An endoscopy company's commitments to ICT —Olympus Corporation	<i>Yoshiyuki Yamashita</i>	791
