

ENDOSCOPIA DIGESTIVA

Volume 36, Number 6, June 2024

CONTENTS

Special Issue

Never overlook systemic disorders!—Guessing from endoscopic findings—

Introductory remarks

- Bear in mind the differences between “see”, “look at”, and “look after”
when performing endoscopy *Hiroshi Kashida* 808

I. Systemic diseases which mainly involve the esophagus

- Multiple epithelial peeling and blistering lesions in the esophagus:
autoimmune bullous disorders (pemphigus • pemphigoid) *Rieko Nakamura et al.* 810
- Exfoliative esophagitis predominant in the middle and lower esophagus:
drug-induced esophagitis/esophageal ulcer *Miwako Arima et al.* 813
- Refractory reflux esophagitis: systemic sclerosis *Shiko Kuribayashi et al.* 817
- Multiple punched-out esophageal ulcers in patients presenting with stomatitis:
Behçet’s disease *Akira Matsui et al.* 821
- Benign esophageal ulcer with lymphadenopathy: tuberculosis *Yosuke Yamada et al.* 825
- Multiple subepithelial lesions/wall thickening in the esophagus:
Alport-leiomyomatosis syndrome *Shoji Kobayashi et al.* 830

II. Systemic diseases which mainly involve the stomach

- Granular and diffusely whitish gastric mucosa in patients with chronic renal disease:
lanthanum deposition in the gastroduodenal mucosa *Hironori Tanaka et al.* 833
- Multiple gastric telangiectasia in patients presenting with frequent epistaxis:
hereditary hemorrhagic telangiectasia (HHT) *Ayaka Takasu et al.* 839
- Multiple ulcers in the gastric antrum in the absence of *H. pylori* infection:
NSAID-induced ulcers *Hayato Yamaguchi et al.* 843
- Punched-out gastric ulcer in the absence of *H. pylori* infection or medication:
cytomegalovirus infection *Takuya Komura et al.* 847
- Ulcers mimicking acute gastric mucosal lesions in young and middle-aged patients:
syphilis *Maiko Kishino et al.* 852
- Multiple reddish papules in the stomach: HIV-associated Kaposi’s sarcoma *Ryoko Tatsuno et al.* 856
- Gentle hill of subepithelial lesion in the stomach: AL amyloidosis *Takuma Okamura et al.* 860

Gastric depressed lesion with gentle hill of marginal elevation: sarcoidosis	<i>Yoshito Hayashi et al.</i>	863
III. Systemic diseases which mainly involve the duodenum and small intestine		
Neuroendocrine neoplasm in the major duodenal papilla: neurofibromatosis type 1	<i>Tomoya Ogawa et al.</i>	866
Multiple duodenal erosions with submucosal hematoma: IgA vasculitis	<i>Yoshikazu Tsuzuki et al.</i>	870
Granular surface of the duodenal membrane in patients with chronic inflammatory disease:		
AA amyloidosis	<i>Ryutaro Mizue et al.</i>	874
Atrophy of duodenal and small intestinal villi in patients presenting with diarrhea:		
Olmesartan-associated enteropathy	<i>Sho Sasaki et al.</i>	879
Annular ulcer/stenosis of the small intestine: NSAID-related small intestinal injury	<i>Jun Omori et al.</i>	883
IV. Systemic diseases which mainly involve the colorectum		
Colonic disorder in patients under anti-cancer chemotherapy presenting with diarrhea:		
immune-checkpoint inhibitor-related gastrointestinal disorder	<i>Kazunori Nagashima et al.</i>	887
Hexagonal pattern of intestinal mucosa in organ transplant recipients presenting with diarrhea:		
graft-versus-host disease	<i>Motowo Mizuno et al.</i>	892
Bronze-colored colon mucosa: mesenteric phlebosclerosis caused by intake of herbal medicine		
(Sanshishi)	<i>Tetsuya Ueo et al.</i>	895
Rectal ulcer in young and middle-aged patients: syphilis	<i>Kiyonori Kobayashi</i>	900
V. Systemic diseases which may involve the entire gastrointestinal tract		
Multiple gastrointestinal non-neoplastic polyps in patients presenting with diarrhea:		
Cronkhite-Canada syndrome	<i>Mayo Tanabe et al.</i>	904
Multiple gastrointestinal polyps accompanied by densely distributed glycogenic acanthosis:		
Cowden syndrome	<i>Katsushi Seza et al.</i>	909
Multiple gastrointestinal polyps accompanied by pigmentation of the lips/digits:		
Peutz-Jeghers syndrome	<i>Hirotsugu Sakamoto et al.</i>	913
Series Efficient Use of Big Data and Information and Communications Technology (ICT) in Endoscopy		
Endoscopy company's commitments to ICT—FUJIFILM	<i>Daishi Nishida</i>	919
