Diagnosis and Treatment of *H. pylori*-uninfected Gastric Cancer: Update

Introductory remarks	<i>Taiji Akamatsu</i>	652
Recent trends in <i>H. pylori</i> -uninfected gastric cancer	<i>Nobuhiro Sakaki</i>	655
Pathological diagnosis of <i>H. pylori</i> -uninfected gastric neoplasm	<i>Shigeki Sekine</i>	663
Endoscopic diagnosis of <i>H. pylori</i> -uninfected gastric cancer:		
Basics for detection and characterization	<i>Rie Yoshimura et al.</i>	670
【Note】 Prevalence of <i>H. pylori</i> -uninfected gastric cancer in screening endoscopy	<i>Shunichiro Ozawa et al.</i>	678
I . Gastric adenocarcinoma of fundic gland type and gastric adenocarcinoma of fundic gland mucosa type		
Endoscopic diagnosis	<i>Daiki Abe et al.</i>	680
Endoscopic resection	<i>Mai Fukuda et al.</i>	688
【Note】 Gastric adenocarcinoma of fundic gland type: Can the indication for additional surgery		
after ESD be considered the same as in cases of common type of gastric carcinoma?	<i>Takashi Yao et al.</i>	693
II . Foveolar-type gastric tumor with a raspberry-like appearance		
Endoscopic diagnosis and treatment of foveolar-type gastric tumor		
with a raspberry-like appearance	<i>Yusuke Takahashi et al.</i>	696
III . Flat-elevated foveolar-type neoplasm		
Endoscopic diagnosis of flat-elevated foveolar-type neoplasm	<i>Mitsuru Kaise et al.</i>	702
Tips for endoscopic resection of flat-elevated foveolar-type neoplasm		
while controlling air volume	<i>Kosuke Tanaka et al.</i>	709
IV . Undifferentiated adenocarcinoma		
Undifferentiated adenocarcinoma (diffuse type) arising		
from <i>H. pylori</i> -uninfected gastric mucosa	<i>Kingo Hirasawa et al.</i>	713
【Column】 Signet ring cell carcinoma arising from <i>H. pylori</i> -uninfected gastric mucosa:		
Must it advance?	<i>Junko Fujisaki et al.</i>	718
V . Well-differentiated tubular adenocarcinoma: Intestinal type and gastrointestinal type		
Well-differentiated tubular adenocarcinoma:		
Intestinal type and gastrointestinal type	<i>Nobukazu Yorimitsu et al.</i>	722

VI. Adenocarcinoma of esophagogastric junction and gastric cardia rising from <i>H. pylori</i> -uninfected mucosa		
Clinical and pathological characteristics of esophagogastric junctional and gastric cardia adenocarcinoma in <i>H. pylori</i> -naïve stomach	<i>Daisuke Yoshimura et al.</i>	729
【Note】 Pathology of cancer arising from esophagogastric junction and gastric cardia:		
Barrett esophageal adenocarcinoma and gastric cancer at the cardia	<i>Fumiyoshi Fujishima et al.</i>	735
【Topics】 Is adenocarcinoma induced by proton pump inhibitor from fundic gland polyp?	<i>Takashi Kawai et al.</i>	738
VII. Advanced gastric cancer arising from <i>H. pylori</i> -uninfected mucosa		
Clinicopathological characteristics of <i>H. pylori</i> -uninfected advanced gastric cancer	<i>Ryutaro Mizue et al.</i>	742
VIII. Special type gastric cancer arising from <i>H. pylori</i> -uninfected mucosa		
Gastric cancer arising from the mucosa with autoimmune gastritis	<i>Shoko Ono et al.</i>	748
Gastric neoplastic lesions developing in APC-associated polyposis (FAP, GAPPS)	<i>Yusaku Shimamoto</i>	754
