Special Issue

To Perform or Not to Perform Endoscopic Treatment in Super-elderly Patients with Superficial Gastric or Esophageal Cancer

Introductory remarks: How far should we proceed with endoscopic treatment in super-elderly patients?	<i>Nobuhiro Sakaki</i> 1486
Problems associated with multimorbidity in a super-aged society and countermeasures against them	<i>Ken Shinmura</i> 1488
Importance of physical activity indices and methods of assessment and intervention in the super-elderly patients with gastrointestinal cancer	<i>Tsuyoshi Harada et al.</i> 1495
Epidemiology and natural history of gastric cancer	<i>Fumiaki Ishibashi et al.</i> 1502
《Note》Until what age should we continue screening for gastric cancer?	<i>Koichi Furukawa</i> 1509
Epidemiology and natural history of esophageal cancer	<i>Fumisato Sasaki</i> 1512
I . Super-Elderly Patients with Gastric Cancer	
To perform or not to perform: Gastric ESD in the super-elderly	<i>Waku Hatta et al.</i> 1518
《Case Study》The case of a super-elderly patient with early gastric cancer where indication for ESD was difficult to determine due to multiple comorbidities	<i>Nanami Imai et al.</i> 1521
Endoscopic submucosal dissection (ESD) for early gastric cancer in the super-elderly: Current status and real-world practice	<i>Yuichiro Mikuriya et al.</i> 1524
Early gastric cancer in the super-elderly: Choice of treatment methods other than ESD	<i>Taiji Akamatsu et al.</i> 1529
《Topics》Efforts toward early discharge after endoscopic therapy: Based on our experience with endoscopic hand suturing (EHS)	<i>Yu Ebisawa et al.</i> 1534
Palliative ESD in super-elderly patients with gastric cancer: Present indications and outcomes	<i>Hajime Yoshii et al.</i> 1538
《Note》LECS for elderly gastric cancer patients as an alternative treatment	<i>Marie Washio et al.</i> 1544
Indications for surgical gastrectomy in super-elderly patients where ESD resulted in eCura C-2	<i>Hiroshi Suda et al.</i> 1550
II . Super-Elderly Patients with Esophageal Cancer	
To proceed or not to proceed: ESD for esophageal cancer in the super-elderly	<i>Takashi Akutagawa et al.</i> 1555

《Case Study》 The case of a super-elderly patient with pharyngoesophageal cancer where pretreatment decision-making and posttreatment troubleshooting were both difficult	<i>Miwako Arima et al.</i> 1559
The reality of esophageal ESD in super-elderly patients	<i>Noriaki Ito et al.</i> 1565
I'm in big trouble! How best to manage stenosis after esophageal ESD in the super-elderly?	<i>Takuma Okamura et al.</i> 1572
Practicing palliative ESD as a salvage treatment for locally recurrent esophageal cancer after CRT	<i>Atsuki Imai et al.</i> 1576
《Note》 Argon plasma coagulation therapy for esophageal cancer in the super-elderly	<i>Kenro Kawada</i> 1580
Indications and outcomes of radiotherapy in super-elderly patients with superficial esophageal cancer	<i>Keiichi Jingu et al.</i> 1583
Super-elderly patients with esophageal cancer: Are they eligible for surgery?	<i>Kazuhiko Yamada et al.</i> 1587
