Special Issue

Back to Basics: Endoscopic Resection of Polyps/Tumors in the Colorectum

Introductory remarks: Endoscopic diagnosis and treatment of early colorectal cancer	<i>Yutaka Saito</i>	242
Basics of pretreatment: Bowel cleansing, premedication and sedation	<i>Kiyonori Kobayashi et al.</i>	244
Patients on antithrombotic therapy: Management before and after endoscopic resection	<i>Yoji Takeuchi et al.</i>	249
How to choose a suitable resection method for each lesion	<i>Masashi Misawa et al.</i>	255
Basics for handling resected specimens	<i>Toru Kawahara et al.</i>	263
I. Endoscopic resection of polyps/tumors		
Cold polypectomy (cold snare polypectomy and cold forceps polypectomy)	<i>Nobuhisa Minakata et al.</i>	269
Hot snare polypectomy	<i>Hidenori Tanaka et al.</i>	274
《Note》 Endoscopic resection of large pedunculated colorectal polyps using a detachable snare (an endoloop)	<i>Hiroshi Kashida</i>	278
《Note》 Intensive downstaging polypectomy for patients with familial adenomatous polyposis	<i>Kazuki Matsuyama et al.</i>	282
Conventional EMR	<i>Sae Ohwada et al.</i>	285
《Note》 Endoscopic resection for rectal neuroendocrine tumors	<i>Yuki Yonemoto et al.</i>	289
Underwater EMR & gel immersion EMR	<i>Kazunori Takada et al.</i>	293
《Note》 Management of residual or recurrent tumors	<i>Yoriaki Komeda et al.</i>	299
Precutting EMR and hybrid ESD	<i>Akimichi Hayashi et al.</i>	301
Basic techniques of colorectal ESD :		
A practical approach to safe and robust dissection	<i>Naoya Toyoshima et al.</i>	306
II. Hemostasis and wound closure related to polyp/tumor resection		
Bleeding related to endoscopic polyp/tumor resection: Hemostasis and prophylaxis	<i>Hirohito Tanaka et al.</i>	311
Wound closure using conventional clips	<i>Yorihito Hayashi et al.</i>	318
Defect closure using repositionable clips	<i>Naoya Tada et al.</i>	324
Closure of the perforated site with an over-the-scope cap (OTSC):		
Device preparation and step-by-step application	<i>Yohei Minato et al.</i>	329
