

ENDOSCOPIA DIGESTIVA

Volume 38, Number 6, June 2026

CONTENTS

Special Issue

Duodenal Neoplasia Should Be Assessed This Way: 2026

Introductory remarks: A New Era in the Management of Duodenal Lesions:

Reconsidering the Fundamentals of Diagnosis, Treatment, and Postoperative Management *Naohisa Yahagi* 674

Epidemiology and natural history of duodenal neoplasms *Daisuke Oshikawa et al.* 676

Pathology of duodenal neoplasms *Tetsuo Ushiku* 682

Basic techniques for duodenal endoscopy *Takashi Ueno et al.* 688

I. Superficial Nonampullary Duodenal Epithelial Tumors (SNADET)

Endoscopic assessment for determining treatment strategy for SNADET *Naomi Kakushima et al.* 694

Lesions to be differentiated from SNADET *Yosuke Toya et al.* 699

《Topics》 Duodenal Structure (DS) classification for differential diagnosis
between neoplastic and non-neoplastic lesions *Atsushi Nakayama* 705

《Note》 Lesions requiring differential diagnosis from SNADET
—Appropriateness of biopsy— *Yugo Suzuki et al.* 709

《Column》 Lesions to be differentiated from SNADET:
What should be done in a private clinic? *Hironori Masuyama et al.* 713

Indications for endoscopic resection and criteria for curative resection:
Briefing on the new guidelines *Takashi Hirose et al.* 716

Cold snare polypectomy/underwater EMR/Conventional EMR for SNADET *Yasushi Yamasaki* 720

《Note》 Intensive downstaging polypectomy of superficial non-ampullary duodenal
epithelial tumors burden in familial adenomatous polyposis *Reona Kawamura et al.* 725

《Topics》 A non-randomized confirmatory trial of cold snare polypectomy
for SNADET (D-COP trial) *Kohei Takizawa* 728

Water pressure method (WPM) for duodenal ESD followed by defect closure *Teppei Akimoto et al.* 734

Duodenal ESD utilizing gas-free immersion (GFI) system and subsequent defect closure
with reopenable clip over the line method (ROLM) *Tatsuma Nomura et al.* 739

Strategies to prevent post-duodenal ESD complications and the progress of
endoscopic suturing techniques *Yu Sato et al.* 744

Laparoscopic and endoscopic cooperative surgery (LECS) for SNADET (D-LECS)	<i>Hidetoshi Endo et al.</i>	748
《Note》 What the endoscopist should tell the patient before an endoscopic resection of duodenal neoplasm concerning the possibility of conversion to pancreatoduodenectomy and its consequences	<i>Satoshi Okubo et al.</i>	754
II. Neoplasia of the Major and Minor Duodenal Papilla		
How to observe the major and minor duodenal papilla	<i>Masafumi Mizuide et al.</i>	756
Assessment before endoscopic papillectomy (EP)	<i>Kenjiro Yamamoto et al.</i>	761
Basic techniques of endoscopic papillectomy (EP)	<i>Noriyuki Hirakawa et al.</i>	766
Management of post-procedural adverse events and follow-up after endoscopic papillectomy	<i>Hiroki Kawashima et al.</i>	769
《Topics》 Endoscopic submucosal dissection for superficial duodenal epithelial tumors involving the papilla	<i>Osamu Dohi et al.</i>	775
