Special Issue

Safer and Securer Endoscopic Submucosal Dissection: Presentation with Fascinating Footage

Introductory remarks: Visual presentation of safe and secure endoscopic submucosal dissection (ESD):

Handing down masters' techniques to the next generation *Yutaka Saito* 902

I. Esophagus

Delineation and depth prediction in esophageal cancer *So Kodama et al.* 904

Standard method of esophageal ESD *Yoshiaki Ando et al.* 910

《Note》What should we do when perforation occurs during esophageal ESD? *Takuro Tomino et al.* 915

Strategies for preventing postoperative complications in esophageal ESD *Mitsunori Kusuhara et al.* 918

II. Stomach

Delineation and depth prediction in early gastric cancer *Shigetaka Yoshinaga et al.* 922

Standard method of gastric ESD using a needle-type knife *Hideyuki Chiba et al.* 927

Standard method of gastric ESD using Insulated-Tip (IT) Knife *Kazuo Shiotsuki et al.* 933

Difficult ESD in the stomach: Three principles to overcome fibrosis
and strategies for cardiofundal lesions *Koichi Furuta et al.* 938

《Note》What should we do when perforation occurs during gastric ESD? *Tetsuhiko Hirai et al.* 943

Strategies for preventing postoperative complications in gastric ESD *Eisuke Nakao et al.* 946

III. Duodenum

Characterization and depth prediction in non-ampullary duodenal
epithelial tumor (NADET) *Takuma Hiramatsu et al.* 951

Water pressure method (WPM) for duodenal ESD and closure of mucosal defect *Teppey Akimoto et al.* 955

Duodenal gel immersion ESD using scissor-type knife and closure of mucosal defect *Osamu Dohi et al.* 959

《Note》What should we do when perforation occurs during duodenal ESD? *Yusuke Kawai et al.* 963

《Note》Under-insufflation closure of the mucosal defect using clips after duodenal ESD *Kingo Hirasawa* 965

《Note》Clinical practice of ENBPD following duodenal ESD *Shintaro Kawasaki et al.* 968

IV. Colorectum

Characterization and depth prediction in colorectal epithelial neoplasm *Ryuta Fujii et al.* 971

Standard method of colorectal ESD *Yuichiro Hirai et al.* 978

Saline-immersion ESD with pocket creation method in the colorectum:

Optimized electrosurgical settings and continuous low-pressure saline perfusion (CLPSP)
for creating a bubble-free environment *Hironori Yamamoto et al.* 982

《Note》What should we do when perforation occurs during colorectal ESD?	<i>Akiko Ohno et al.</i>	988
Strategies for preventing postoperative complications in colorectal ESD	<i>Hidenori Tanaka et al.</i>	992
Handling of ESD specimens	<i>Ryosuke Goto et al.</i>	997
Concluding Remarks		
Aiming for safer and securer ESD	<i>Nobutsugu Abe</i>	1001
